This is an informational Notice to Bidders, not an addendum; therefore no acknowledgement is required.

GENERAL – QUESTIONS & ANSWERS

1. Q: I would expect to see some top flange distortion from the 5/16” continuous fillet welds at the beam web plate. The intermediate stiffer plates will help to eliminate this in their close proximity but is there a tolerance requirement for flatness as I don’t see a reference toward this on the drawings or in the spec. Do you agree?

A: We agree that some distortion form the 5/16 continuous weldment on the top flange is expected but should be controlled to maintain a tolerance of +or – 1/32”

2. Q: What is the schedule for issuing a notice to proceed or ARO after bid opening date?

A: We hope to have an NTP issued 10-15 days after the bid opening. It all depends on when we receive the insurance and bonds.

END OF NOTICE TO BIDDERS
